Mr. Gene Evans
Brighton Landfill
1201 Dunn Road
St. Louis, Missouri 63138

Gentlemen:

This will acknowledge receipt of your Application for Permit to modify a solid waste management site, dated July 16, 1979, and received by this Agency on July 16, 1979.

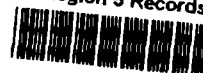

A preliminary review of the application has been completed. A Technical/Land Use Review has not been effected at this time. The following comments are made pursuant to the preliminary review:

Letters of notification were not included with your application. Please refer to the Amendment to Section 39 of the Environmental Protection Act and to the Land Use Questions - #8, enclosed. Any application received in this office must be accompanied by letters of notification to certain public officials and adjacent landowners. See list below. Please make additional copies of the letters enclosed, address one to each of the proper persons and send them to us with your submittal.

1. State's Attorney for the County
2. County Board Chairman
3. State Legislators (3 Representatives, 1 Senator)
4. Clerk of any municipality within 3 miles of the site
5. County Zoning Board
6. Planning Agency
7. Adjacent landowners

All of the above must be notified when applying for a Development or Operating Permit. When applying for a Supplemental Permit (to modify site development or operation, or to accept special waste), only items one through four (1-4) need be addressed.

EPA Region 5 Records Ctr.

296466

Page 2

Based upon the above conditions, this Agency must deny the permit. Please be assured of our willingness to cooperate with you in every way possible. When the required items are received with a letter of reapplication, you may be assured of our prompt attention.

Very truly yours,

SAS

Re: Permit #1979-8-DE
Macoupin County
Brighton Landfill #2

E.P.A. - D.L.P.C.
STATE OF ILLINOIS

Dear Mr. Cavanagh:

Enclosed herewith you will find a copy of an engineering investigation report prepared by John Mathes & Associates, Inc. dealing with an additional sub-surface study at the referenced site. We are forwarding this data at the request of the owners.

The study was undertaken to provide additional information for your review, relative to the acceptance of special wastes at this site.

Also enclosed is a print of the Alternate "A" drawing which is a part of the referenced permit.

The owners are requesting that the location of the initial excavation be re-located to the northeast corner of the site as shown in red on the print. This would also alter the location of the access road and ramp into the excavation.

A plan view of the proposed all-weather surfaced ramp is also shown in red on the print.

The owners have indicated that on or about July 30, 1979, the initial excavation will be completed and that they will be requesting the site inspection prior to the issuance of the operating permit for the new site.

Respectfully submitted,

SHEPPARD, MORGAN & SCHWAAB, INC.
